

# 2024 Local School STEM Fund

## 2024 Local School STEM Fund Overview

Snowy Hydro is committed to fostering learning opportunities and career pathways for local young people with a focus on science, technology, engineering and maths (STEM).

We deliver on this promise through our Snowy STEM Academy, partnering with regional schools and investing in local STEM education through our Local School STEM Fund.

Through our second annual Local School STEM Fund, Snowy Hydro has provided a total of \$220,266 to 27 schools in 18 locations across the Snowy Mountains and Cessnock regions of NSW.

## Benefit of funding to students and the community

Snowy Hydro established the Local School STEM Fund to bring real-life STEM into the classrooms of our local schools. Recognising that today's students are tomorrow's workforce, the funding aims to inspire student's interest in STEM and to promote creative and critical thinking to complex problems.

These initiatives will impact the students themselves, their schools, their communities and their future aspirations. As these initiatives evolve and in partnership with Snowy Hydro the students will see the value in STEM and be able to connect the skills learned today to the jobs of tomorrow.

These initiatives have been carefully selected to ensure that they benefits of the programs extend beyond the initial year and with the support of Snowy Hydro the legacy of the Local School STEM Fund will extend to encompass all students within the local community.
